

Hello. On a daily basis my wife and I listen to the K-LOVE radio station on 100.1 in San Diego, CA. There is no other radio station in our area that offers content that is at all close to that provided by K-LOVE. My understanding is that this proposal to expand LPFM stations may have an effect (potentially big effect) on our reception of K-LOVE. This would be a terrible thing for me and hundreds of thousands of people like me who rely on the daily broadcasts from K-LOVE. The likelihood of any LPFM station providing anything close to the content and the quality of broadcast provided by K-LOVE is extremely small in my estimation. The loss of K-LOVE (or reduction in broadcast power, which would essentially be a complete loss) would be a very bad thing for this community - there is no other content like it available. I cannot state this strongly enough - please do not make this change!

Very respectfully,  
Dave Hina
